

# A NEW DIAMOND TOOL FOR SUPER-FINISHING ALUMINUM WHEELS

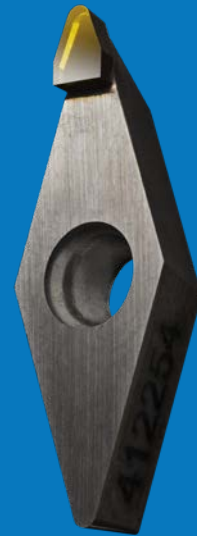

DIAMOND

[www.kydiamond.ca](http://www.kydiamond.ca)

# ADVANTAGES

- Machine a "mirror-like" surface on any wheel design
- No polishing
- Works on standard wheel lathes
- Run the same speeds and feeds as PCD tools  
(Depth of cut should not exceed .002 -.005")

# TOOL FEATURES

- Carbide insert with highest quality vacuum brazed single-crystal diamond
- Under ideal conditions, 100's of wheels can be machined before re-sharpening
- Tools are used by the world's largest manufacturer of OEM wheels

# TOOL CARE

- Single crystal diamond is extremely hard, but can be damaged if not properly handled
- Do not drag anything over the edge
- Don't allow the diamond to come in contact with other hard surfaces.
- Keep it stored in the protective container when possible.
- If necessary, wipe front of tool as shown with acetone on Q-tip

## USA Customers

Send all tools for repair to:

NFI Industries  
c/o K&Y Diamond Ltd.  
2002 Ridge Road  
Champlain, NY, USA 12919

## Canada and International Customers

Send all tools for repair to:

K&Y Diamond  
1801 Boul. Saint Regis  
Dollard-des-Ormeaux, QC, H9B 2M9  
CANADA
